Education

Degree

Ph.D. in Political Science, The University of Iowa, U.S.A. 2018-05 (Expected)

Fields: Comparative Politics, Political Methodology, International Relations.

Dissertation: “Dominant Language: A Political Stabilizer.”

Committee Chair: Wenfang Tang

Committee Members: William M. Reisinger, Frederick Solt, Caroline J. Tolbert, and David Cassels Johnson (Education)

Abstract: My dissertation explores a new path to influence the political trust in authoritarian countries—through language policy. The research theorizes that an authoritarian government can use a single-official-language policy to adjust citizens’ political trust through their self-evaluation, relations with government representatives, and political value system. In particular, the policy creates a social and political environment where the official-language speakers can hold more positive self-prospects and conduct more efficient political communications, and thus trust the government more. A systematic analysis of a nationally representative survey provides supportive evidence for this argument. It found that, although showing insignificant influence on the trust in the central government and weakening citizens’ attachment to the local government, promoting citizens’ official language proficiency increase the positive influence of self-social evaluation and reduce the negative influence of political activism on the trust in the local government. Additionally, the single-official-language policy provides a special political identity to the official language to enhance the credibility of the government representative. With a modified matched-guise method and an original field experiment with Chinese high school students, the research shows that bureaucrats who speak the official language earn significantly more trust and intimacy than those speaking the local dialects. Finally, using a computer-assisted text analysis on 1,371,607 political articles together with network analysis and econometric inferences, the research uncovers a refocusing strategy the Chinese government use with the official political language system. The strategy allows the government to masquerade political concepts and conduct strategic communication with citizens to serve for the regime preservation. My dissertation concludes that language policy is far more than a social institution or only affect the minorities of the population. It can become a powerful tool for an authoritarian government to influence the political trust of the mass majority.

Certificate in Informatics, The University of Iowa, U.S.A. 2016-12

M.A. in Political Science, The University of South Carolina, U.S.A. 2013-03

Thesis: “Connecting Nationalism and Political Transition: A Study of Nationalist Influence on Political Transition Based on the Chinese Case.”

M.A. in Political Science, The University of Regina, Canada 2011-03

Thesis: “Culture and Cultural Diplomacy: A Comparative Study of a Canadian and Chinese Case.”

LL.B. in International Politics, Nankai University, China 2009-06

Additional Training

Experimental Methods 2014-06/07

IPSA-NUS Summer School of Social Science Research Methods, Singapore.

Professional Positions

Statistical Consultant, Iowa Social Science Research Center, University of Iowa.

Research Interests

Comparative Politics:

Language policy, Chinese politics, public opinion, political communication, political culture.

Political Methodology:

Survey experiment, text analysis, network analysis, spatial analysis, multilevel analysis.

International Relations:

Public diplomacy, international cultural relations, Chinese foreign policy.

Research Experience

Data Collection

Online survey experiment in China. 2017-02

Designed an online survey experiments, finished 994 surveys.

Field survey experiment in China. 2016-12

Designed and conducted survey experiments in Chengdu and Meizhou of China on 421 subjects in total.

Web scrapping Newspaper Documents. 2016

Scrapped the text content of *People's Daily* (1946-2003) from a third party website, ending with 1,371,607 documents.

Research Assistant

Corruption and Politics in Russia, Ukraine, and Georgia Project (Univ. of Iowa) 2015-2016

Standardized World Income Inequality Database Project (Univ. of Iowa) 2015-05/06

Survey in Eastern Asia Project (Univ. of South Carolina) 2013-05/08

Teaching Interest

Comparative Politics:

Intro to Comparative Politics, Language Policy, Public Opinion, Asian Politics, Chinese Politics, Ethnicity, Nationalism, Democratization.

Political Methodology:

Research Design, Intro to Quantitative Analysis in Social Science, Regression, Maximum Likelihood Estimation, Multilevel Modeling, Spatial Analysis, Network Analysis, Experiment, Structural Equation Modeling, Survey Design and Analysis, Programming in R, Stata, and Python, Data Visualization.

Teaching Experience

Instructor, University of Iowa

Introduction To R Workshop Series 2015-present

Multilevel Modeling with Stata and R 2016-present

Math Camp for Incoming Graduate Students (with Shuai Jin)	2016-08
